

This Earth Day, let's not choose between our planet and our communities.

SB 5126 cuts emissions to benefit both.

“The Climate Commitment Act... would enable the state to slash greenhouse gas emissions at the pace and scale necessary to fight the climate crisis, help address the disproportionate and historic pollution burden in many low-income communities and communities of color, and provide a policy model for other states on how to achieve their emission reduction goals.”

Katelyn Roedner Sutter, Environmental Defense Fund, April 13, 2021

Environmental organizations along with equity advocates, local employers, businesses, and people all across Washington support the Climate Commitment Act (SB 5126) because it can make Washington cleaner, healthier, and more prosperous. Legislators, you have a chance to do what's right for the state, our planet, and our next generation. **Pass SB 5126 for Washington's future.**

We thank the supporters of SB 5126
