

# WASHINGTON IS INVESTING IN CLEAN AIR AND LOCAL JOBS.

Thanks to the leadership of Governor Inslee, Senator Carlyle, and Representative Fitzgibbon, Washington can breathe a little easier. In the face of rising greenhouse gas emissions in our state, elected officials responded this session by passing two historic bills that benefit both our environment and the economy.

By passing the Climate Commitment Act and the Clean Fuel Standard, these leaders put Washington on a path to meeting its low carbon goals, greener infrastructure, cleaner air, and more sustainable jobs. And the progress won't stop there – those of us who supported the Acts will keep encouraging our legislators to do what's right for Washington, our planet, and the next generation.
